Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments,  
Motions to Intervene, and Competing Applications

On February 5, 2015, Adam Robert Rousselle, II filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Nockamixon Dam Water Power Project ( project) to be located on Tohickon Creek, in Bucks County, Pennsylvania. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) the existing Nockamixon dam, which is 1,511 feet long and approximately 112 feet high discharging into Tohickon Creek; (2) Nockamixon dam impounds a reservoir of 40,000 acre-feet with a surface area of 1,450 acres, at a pool elevation of 395.0 feet mean sea level; (3) a proposed reinforced concrete powerhouse housing three pump turbine generating units with a total installed capacity of 150 kilowatts; (4) a proposed 826-foot-long, 34.5-kilovolt primary transmission line connected to Metropolitan Edison Company; and (5) appurtenant facilities. The estimated annual generation of the project would be 834,000 kilowatthours.
